Turbines under 50m in height are not included on this plan. Refer to inset plan for single turbines between 50m-80m within 5km. See Chapter 6 of the ES for further details.

Schemes that are at scoping or at the pre-planning stage have also not been illustrated or considered as part of the assessment due to the lack of certainty that these schemes will come forward and the lack of adequate project details. This is in accordance with the approach advocated in GLVIA3.
