Appendix 10.1 Historic Environment Gazetteer

Introduction

The Gazetteer comprises a list of all the sites identified and directly considered during the assessment. Tables A10.1 (Inner Study Area) and A10.2 (Middle Study Area) below show the locations of sites, how these were discovered, details of what is known about them and assigns a level of importance/sensitivity. This is all in accordance with the results produced in the Historic Environment chapter (refer to Chapter 10) and shown in Figures 10.1 to 10.3.

The question marks (?) included within Table A10.1 have two meanings. They are:

- used after site descriptions when the actual site type may not be definitive, such as enclosure? or burial cairn? This applies if the interpretation has not been tested by excavation and a hypothesis/interpretation is put forward about the site; or
- used because the sites are previously unrecorded, have been newly identified during the DBA and the names are suggested based on proximity to geographical or topographical features rather than actual.

Sites in the Outer Study Area are listed in Table A10.3 and include all Scheduled Monuments, Category A Listed Structures and a World Heritage site within the study area. All sites are considered to have high sensitivity or level of importance.
