
KEY

- Wind Turbine Position
- 5km Middle Study Area
- Scheduled Monument
- Conservation Area
- Category A Listed Building
- Category B Listed Building
- Category C Listed Building
- HER Site (Code C or V)

Visibility (turbine tip)

- 1-3
- 4-6
- 7-9
- 10-13

NOTE

The blade tip ZTV was prepared by Pegasus Group using Resoft WindFarm. The programme used topographical height data (OS Terrain 50) to build a 'bare ground' terrain model rendered using a square grid to illustrate whether the turbines would be visible in each 50 m x 50 m square on the grid for a specified distance in every direction from the site. The bare ground ZTV does not take any account of vegetation or the built environment which may screen views of the development; it is, as such, a 'worst case' zone of visual influence.
