

KEY

- Site Boundary and Turbine Locations
- Radii
- Other Wind Farms

Zone of Theoretical Visibility (ZTV)
run to blade tip height of 200m

- Douglas West Wind Farm Extension visible only
- One or more of the following schemes visible:
- Douglas West
- Poniel Wind Farm
- Both Douglas West Wind Farm Extension and one or more of the following schemes visible:
- Douglas West Wind Farm
- Poniel Wind Farm

NB The Zone of Theoretical Visibility (ZTV) image illustrates the theoretical extent of where turbines will be visible from assuming 100% visibility. It is generated using terrain data only and does not take into account any screening that vegetation or the built environment may provide. It is as such a worst case ZTV and the actual extents of visibility are likely to be much less extensive.

Douglas West Wind Farm Extension
Environmental Impact Assessment Report
